

A Little Data — A Lot to Celebrate!

The Sprockets database has significantly improved our data collection and management...
The system is user-friendly and adaptable.

We are thankful for this valuable resource and the opportunity to participate in a citywide movement to foster shared accountability.

- Kara Bixby, Manager of Research & Evaluation, Saint Paul Public Schools Foundation

The Sprockets database is truly a life-saver.

Finally, we could answer important questions

for funders like, "How many unduplicated youth are served by the YMCA?," "How many youth are served in after school programs across the city?," and "What gaps do we need to fill in Saint Paul?"

- Rachel Katkar, Senior Youth Development Coordinator, YMCA of the Greater Twin Cities

JOIN US — let's put the data together and learn!

The Sprockets out-of-school time database pilot was launched in fall 2011 — the first of its kind in Minnesota. We've been collecting, storing and, now, for the first time, sharing information to help make better decisions about out-of-school time across Saint Paul. It's all about using data to improve outcomes for young people.

□ out-of-school time organizations in Saint Paul (at least 88)
